

ATTENDANCE MANAGEMENT POLICY

1. Purpose

The purpose of this policy is to define the rules governing employee attendance, attendance recording, attendance correction requests, approval requirements, and attendance record management. This policy serves as the official reference for employees, managers, Human Resources, and the AI-powered HR Operations Assistant.

2. Scope

This policy applies to all employees of the organization. It covers attendance recording, working hours, attendance correction requests, attendance validation rules, approval requirements, and exception handling.

3. Attendance Rules

Rule AP-001: Standard Working Hours

Employees shall work **8 hours per working day** in accordance with the organization's official working schedule.

Working Hours

- Official working hours shall be **09:00 AM to 06:00 PM**.
- The official lunch break shall be excluded from the total working hours.
- Employees are expected to be available during official working hours unless an approved Leave or Work From Home request exists.

AI Validation Rules

The AI HR Operations Assistant shall verify:

- The attendance record falls within a valid working day.
- The employee has not been granted an approved Leave for the attendance date.
- The employee has not been granted an approved Work From Home request for the attendance date.

Decision Logic

- If the attendance record satisfies the organizational attendance policy, the AI HR Operations Assistant shall continue with attendance validation.
 - If conflicting attendance records, Leave requests, or Work From Home requests are identified, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.
-

Rule AP-002: Attendance Recording

Employees shall record their attendance using the organization's approved attendance management system.

Attendance Details

Each attendance record shall contain the following information:

- Employee ID
- Attendance Date
- Check-in Time
- Check-out Time

AI Validation Rules

Before processing an attendance record, the AI HR Operations Assistant shall verify:

- The Employee ID exists in the Employee Master.
- The Attendance Date is valid.
- The attendance record contains the required check-in and check-out details, wherever applicable.
- The attendance record corresponds to a valid working day.

Decision Logic

- If all required attendance information is available, the AI HR Operations Assistant shall continue with attendance validation.
- If mandatory attendance information is missing or incomplete, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- If the attendance record cannot be interpreted or requires manual verification, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.

Rule AP-003: Attendance Correction

Employees may submit an Attendance Correction Request when their attendance record does not accurately reflect their actual attendance due to genuine reasons.

Attendance Correction Requests may be submitted for situations including, but not limited to:

- Missing Check-in
- Missing Check-out
- Incorrect Check-in Time
- Incorrect Check-out Time
- Attendance System Failure
- Biometric Device Malfunction

- Network Connectivity Issues
- Any other valid operational reason approved by Human Resources.

Mandatory Information

Every Attendance Correction Request shall contain the following information:

- Employee ID
- Employee Name
- Attendance Date
- Correct Check-in Time (if applicable)
- Correct Check-out Time (if applicable)
- Reason for Correction

AI Validation Rules

Before processing an Attendance Correction Request, the AI HR Operations Assistant shall verify:

- The Employee ID exists in the Employee Master.
- The Attendance Date is valid.
- The Attendance Date is not a future date.
- The corrected Check-in Time is earlier than the corrected Check-out Time, where both values are provided.
- All mandatory information has been provided.
- A duplicate Attendance Correction Request does not already exist.
- The request has been submitted within the permitted correction timeline.

Decision Logic

- If all validation rules are satisfied, the AI HR Operations Assistant shall generate an **Approved** recommendation.
- If one or more validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- If the request cannot be automatically validated due to exceptional circumstances or requires manual verification as per organizational policy, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.

If validation is successful, the request shall be marked as **Valid** and forwarded to HR for updating the attendance record.

If validation fails, the request shall be **Rejected** and the employee shall be informed of the missing or invalid information.

Rule AP-004: AI Validation Rules

Before processing an Attendance Correction Request, the AI HR Operations Assistant shall perform the following validations:

- The Employee ID exists in the Employee Master.
- The Attendance Date is valid.
- The Attendance Date is not a future date.
- The Attendance Correction Request has been submitted within the permitted correction timeline.
- The corrected Check-in Time is earlier than the corrected Check-out Time, where both values are provided.
- The attendance record does not conflict with any approved Leave request for the same date.
- The attendance record does not conflict with any approved Work From Home request for the same date.
- A duplicate Attendance Correction Request does not already exist.
- All mandatory information has been provided.

Decision Logic

- If all validation rules are satisfied, the AI HR Operations Assistant shall generate an **Approved** recommendation.
- If one or more validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- If the request cannot be automatically validated or requires manual verification as per organizational policy, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.

Rule AP-005: Duplicate Attendance Correction Requests

Only one Attendance Correction Request shall be accepted for the same employee and the same attendance date.

AI Validation Rules

Before processing an Attendance Correction Request, the AI HR Operations Assistant shall verify:

- No existing Attendance Correction Request has already been submitted for the same employee and attendance date.
- The request is not a duplicate of an existing pending Attendance Correction Request.
- The request has not already been processed for the same attendance date.

Decision Logic

- If no duplicate request exists, the AI HR Operations Assistant shall continue with Attendance Correction processing.
 - If a duplicate Attendance Correction Request is identified, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
-

Rule AP-006: Invalid Attendance Requests

The AI HR Operations Assistant shall validate the attendance details before processing an Attendance Correction Request.

AI Validation Rules

Before processing an Attendance Correction Request, the AI HR Operations Assistant shall verify:

- The Attendance Date is valid.
- The Attendance Date is not a future date.
- The corrected Check-in Time is earlier than the corrected Check-out Time, where both values are provided.
- The attendance details provided are logically valid.

Decision Logic

- If all attendance validation rules are satisfied, the AI HR Operations Assistant shall continue with Attendance Correction processing.
 - If one or more attendance validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
 - If the attendance details cannot be automatically validated or require manual verification, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.
-

Rule AP-007: Audit Logging

Every Attendance Correction Request that is successfully processed after the final decision has been determined shall generate an Audit Log entry.

Audit Log Details

The Audit Log shall contain the following information:

- Employee ID
- Attendance Date
- Updated Field
- Previous Value
- New Value
- Processed By

- Timestamp

Audit Logging Rules

The AI HR Operations Assistant shall ensure that:

- Every successfully processed Attendance Correction Request generates an Audit Log entry.
 - The Audit Log records only the final changes made to the database.
 - Audit Log entries shall not be modified after they have been created.
 - Every Audit Log entry shall include the processing timestamp for future reference and auditing purposes.
-

Rule AP-008: AI Decision Rules

The AI HR Operations Assistant shall evaluate every Attendance Correction Request and generate one of the following recommendations based on the Attendance Management Policy.

Approved Recommendation

The AI shall generate an **Approved** recommendation when the Attendance Correction Request satisfies all applicable policy rules and validation checks.

Rejected Recommendation

The AI shall generate a **Rejected** recommendation when the Attendance Correction Request violates one or more policy rules, contains invalid or incomplete information, or fails any mandatory validation checks.

Needs Human Review

The AI shall generate a **Needs Human Review** recommendation when the Attendance Correction Request cannot be confidently processed due to exceptional circumstances, insufficient information, or when manual approval is required as per organizational policy.

Final Decision

- The AI recommendation shall be used as the initial recommendation for processing the Attendance Correction Request.
- If Human Review is required, the AI recommendation shall be forwarded to the Human Review module.
- The final approval or rejection shall be determined after Human Review, wherever applicable.
