

EMPLOYEE INFORMATION UPDATE POLICY

1. Purpose

The purpose of this Employee Information Update Policy is to define the rules and procedures for updating employee information maintained in the Employee Master database.

This policy serves as the official knowledge base for employees, Human Resources (HR), and the AI-powered HR Operations Assistant. The AI shall use this policy to validate update requests, identify supported fields, verify mandatory information, and assist HR in maintaining accurate employee records.

2. Scope

This policy applies to all employees of the organization requesting updates to their personal or official information maintained in the Employee Master database.

The policy covers:

- Employee information update requests
 - Supported update fields
 - Validation rules
 - AI-based request processing
 - Audit logging
 - HR record maintenance
-

3. Employee Information Update Rules

Rule EIU-001: Employee Information Update

Employee Information Update requests allow employees to modify their personal information maintained in the Employee Master. Employee information shall be updated only after successful validation and final approval.

Information That Can Be Updated

Employees may request updates to the following information:

- Email Address
- Phone Number
- Aadhaar Number
- Bank Account Number
- Residential Address

Eligibility

- The Employee ID must exist in the Employee Master.
- Employees may update only their own information.

Restrictions

- Only one pending update request for the same information field shall be permitted at any time.
- Requests containing invalid or incomplete information shall not be processed.
- Supporting documents may be required for updates to **Aadhaar Number, Bank Account Number, and Residential Address**.
- Updates to **Email Address** and **Phone Number** do not require supporting documents but shall require Human Review before approval.

AI Validation Rules

Before processing an Employee Information Update request, the AI HR Operations Assistant shall verify:

- The Employee ID exists in the Employee Master.
- The requested update field is supported by the system.
- The new value has been provided.
- The new value is in the correct format.
- The request is not a duplicate of an existing pending request.
- All mandatory information has been provided.

Decision Logic

- If all validation rules are satisfied, the AI HR Operations Assistant shall generate an **Approved** recommendation.
- If one or more validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- **All Employee Information Update requests shall be forwarded to the Human Review module for final approval, irrespective of the AI recommendation.**
- Employee information shall be updated only after the final decision has been determined.

Rule EIU-002: Mandatory Information

Every Employee Information Update request submitted by an employee shall contain the following mandatory information:

- Employee ID
- Employee Name
- Information Field to be Updated

- Current Value (where applicable)
- New Value
- Reason for Update

AI Validation Rules

Before processing an Employee Information Update request, the AI HR Operations Assistant shall verify:

- All mandatory information has been provided.
- The Employee ID exists in the Employee Master.
- The requested information field is supported by the system.
- The new value has been provided.
- The request contains sufficient information for processing.

Decision Logic

- If all mandatory information is available, the AI HR Operations Assistant shall continue with information validation.
- If one or more mandatory fields are missing, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- If the request cannot be interpreted due to incomplete or ambiguous information, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.

Rule EIU-003: AI Validation Rules

Before processing an Employee Information Update request, the AI HR Operations Assistant shall perform the following validations:

- The Employee ID exists in the Employee Master.
- The requested information field is supported by the system.
- The new value has been provided.
- The new value is different from the existing value.
- The new value is in the correct format for the requested information field.
- The request is not a duplicate of an existing pending update request.
- All mandatory information has been provided.
- Supporting documents have been provided, where applicable.

Field Validation Rules

The AI HR Operations Assistant shall validate the requested information based on the field being updated:

- **Email Address** shall be in a valid email format.

- **Phone Number** shall contain exactly 10 digits.
- **Aadhaar Number** shall contain exactly 12 digits.
- **Bank Account Number** shall contain only numeric characters and satisfy the organization's validation requirements.
- **Residential Address** shall not be empty and shall contain sufficient information for identification.

Decision Logic

- If all validation rules are satisfied, the AI HR Operations Assistant shall generate an **Approved** recommendation.
- If one or more validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- Regardless of the AI recommendation, **all Employee Information Update requests shall be forwarded to the Human Review module for final approval before any database update is performed.**

Rule EIU-004: Duplicate Update Requests

Only one Employee Information Update request shall be accepted for the same employee and the same information field while another request is pending.

AI Validation Rules

Before processing an Employee Information Update request, the AI HR Operations Assistant shall verify:

- No existing pending request has already been submitted for the same employee and the same information field.
- The request is not a duplicate of an existing pending update request.
- The request has not already been processed with the same information.

Decision Logic

- If no duplicate request exists, the AI HR Operations Assistant shall continue with information validation.
- If a duplicate request is identified, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.

Rule EIU-005: Invalid Information

The AI HR Operations Assistant shall validate the information provided by the employee before processing the request.

AI Validation Rules

Before processing an Employee Information Update request, the AI HR Operations Assistant shall verify:

- The requested information field is supported by the system.
- The new value is in the correct format.
- The new value is different from the existing value.
- The information provided is complete and logically valid.

Decision Logic

- If all validation rules are satisfied, the AI HR Operations Assistant shall continue with Employee Information Update processing.
 - If one or more validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
 - If the information cannot be automatically validated or requires manual verification, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.
-

Rule EIU-006: Audit Logging

Every Employee Information Update request that is successfully processed after the final decision has been determined shall generate an Audit Log entry.

Audit Log Details

The Audit Log shall contain the following information:

- Employee ID
- Updated Information Field
- Previous Value
- New Value
- Processed By
- Timestamp

Audit Logging Rules

The AI HR Operations Assistant shall ensure that:

- Every successfully processed Employee Information Update request generates an Audit Log entry.
 - The Audit Log records only the final changes made to the database.
 - Audit Log entries shall not be modified after they have been created.
 - Every Audit Log entry shall include the processing timestamp for future reference and auditing purposes.
-

Rule EIU-007: AI Decision Rules

The AI HR Operations Assistant shall evaluate every Employee Information Update request and generate one of the following recommendations based on the Employee Information Update Policy.

Approved Recommendation

The AI shall generate an **Approved** recommendation when the Employee Information Update request satisfies all applicable policy rules and validation checks.

Rejected Recommendation

The AI shall generate a **Rejected** recommendation when the Employee Information Update request violates one or more policy rules, contains invalid or incomplete information, or fails any mandatory validation checks.

Needs Human Review

The AI shall generate a **Needs Human Review** recommendation when the Employee Information Update request cannot be confidently processed due to exceptional circumstances, insufficient information, or when manual verification is required.

Final Decision

- The AI recommendation shall be used as the initial recommendation for processing the Employee Information Update request.
- **All Employee Information Update requests shall be forwarded to the Human Review module for final approval, irrespective of the AI recommendation.**
- The final approval or rejection shall be determined after Human Review
