

Rule WFH-001: Work From Home (WFH)

Work From Home (WFH) allows eligible employees to perform their official duties remotely with prior approval, in accordance with the organization's Work From Home policy.

Eligibility

- Employees must be eligible for Work From Home as per organizational policy.

Entitlement

- Employees may avail up to **5 Work From Home days per calendar month**.

Restrictions

- Maximum **5 Work From Home days** may be availed in a calendar month.
- Work From Home requests shall not be permitted on weekends or organization-declared holidays.
- An employee cannot apply for Work From Home on a date for which Leave has already been approved.
- Duplicate Work From Home requests for the same date shall not be permitted.

AI Validation Rules

Before processing a Work From Home request, the AI HR Operations Assistant shall verify:

- The Employee ID exists in the Employee Master.
- The employee has not exceeded the monthly Work From Home limit.
- The requested Work From Home date is a valid working day.
- The requested date is not a weekend or organization-declared holiday.
- The employee does not already have an approved Leave request for the same date.
- A duplicate Work From Home request does not already exist.
- All mandatory information has been provided.

Decision Logic

- If all validation rules are satisfied, the AI HR Operations Assistant shall generate an **Approved** recommendation.
- If one or more validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- If the request requires Human Review as per organizational policy, the AI recommendation shall be forwarded to the **Human Review** module for final approval.
- The stored procedure shall update the WFH Transaction, Attendance Transaction, and Audit Log only after the final decision has been determined.

Rule WFH-002: Mandatory Information

Every Work From Home (WFH) request submitted by an employee shall contain the following mandatory information:

- Employee ID
- Employee Name
- From Date
- To Date
- Reason for Work From Home

AI Validation Rules

Before processing a Work From Home request, the AI HR Operations Assistant shall verify:

- All mandatory information has been provided.
- The Employee ID exists in the Employee Master.
- The From Date and To Date are valid.
- The From Date is not later than the To Date.
- The request contains sufficient information for processing.

Decision Logic

- If all mandatory information is available, the AI HR Operations Assistant shall continue with Work From Home validation.
- If one or more mandatory fields are missing, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- If the request cannot be interpreted due to incomplete or ambiguous information, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.

Rule WFH-003: AI Validation Rules

Before processing a Work From Home (WFH) request, the AI HR Operations Assistant shall verify:

- The Employee ID exists in the Employee Master.
- The employee is eligible for Work From Home.
- The employee has not exceeded the maximum limit of **5 Work From Home days** in the current calendar month.
- The From Date and To Date are valid.
- The From Date is not later than the To Date.
- The requested Work From Home dates are working days.
- The requested dates are not weekends or organization-declared holidays.
- The requested Work From Home dates do not overlap with any approved Leave request.

- A duplicate Work From Home request for the same employee and date range does not already exist.
- All mandatory information has been provided.

Decision Logic

- If all validation rules are satisfied, the AI HR Operations Assistant shall generate an **Approved** recommendation.
- If one or more validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
- If the request cannot be automatically validated or requires manual verification as per organizational policy, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.

Rule WFH-004: Duplicate Work From Home Requests

Only one Work From Home request shall be accepted for the same employee and the same Work From Home period.

AI Validation Rules

Before processing a Work From Home request, the AI HR Operations Assistant shall verify:

- No existing Work From Home request has already been submitted for the same employee and the same date range.
- The requested Work From Home dates do not overlap with any previously approved Work From Home request.
- The request is not a duplicate of an existing pending Work From Home request.

Decision Logic

- If no duplicate request exists, the AI HR Operations Assistant shall continue with Work From Home validation.
- If a duplicate or overlapping Work From Home request is identified, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.

Rule WFH-005: Invalid Work From Home Dates

The AI HR Operations Assistant shall validate the requested Work From Home dates before processing the request.

AI Validation Rules

Before processing a Work From Home request, the AI HR Operations Assistant shall verify:

- The From Date and To Date are valid calendar dates.
- The From Date is not later than the To Date.
- The requested Work From Home dates are working days.
- The requested dates are not weekends or organization-declared holidays.

- The requested Work From Home dates do not overlap with any approved Leave request.
- The requested Work From Home dates do not overlap with any previously approved or pending Work From Home request.

Decision Logic

- If all date validation rules are satisfied, the AI HR Operations Assistant shall continue with Work From Home processing.
 - If one or more date validation rules fail, the AI HR Operations Assistant shall generate a **Rejected** recommendation along with the reason for rejection.
 - If the requested dates cannot be interpreted or require manual verification, the AI HR Operations Assistant shall generate a **Needs Human Review** recommendation.
-

Rule WFH-006: Audit Logging

Every Work From Home request that is successfully processed after the final decision has been determined shall generate an Audit Log entry.

Audit Log Details

The Audit Log shall contain the following information:

- Employee ID
- Work From Home Date(s)
- Processed By
- Timestamp

Audit Logging Rules

The AI HR Operations Assistant shall ensure that:

- Every successfully processed Work From Home request generates an Audit Log entry.
 - The Audit Log records only the final changes made to the database.
 - Audit Log entries shall not be modified after they have been created.
 - Every Audit Log entry shall include the processing timestamp for future reference and auditing purposes.
-

Rule WFH-007: AI Decision Rules

The AI HR Operations Assistant shall evaluate every Work From Home request and generate one of the following recommendations based on the Work From Home Policy.

Approved Recommendation

The AI shall generate an **Approved** recommendation when the Work From Home request satisfies all applicable policy rules and validation checks.

Rejected Recommendation

The AI shall generate a **Rejected** recommendation when the Work From Home request violates one or more policy rules, contains invalid or incomplete information, or fails any mandatory validation checks.

Needs Human Review

The AI shall generate a **Needs Human Review** recommendation when the Work From Home request cannot be confidently processed due to exceptional circumstances, insufficient information, or when manual approval is required as per organizational policy.

Final Decision

- The AI recommendation shall be used as the initial recommendation for processing the Work From Home request.
- If Human Review is required, the AI recommendation shall be forwarded to the Human Review module.
- The final approval or rejection shall be determined after Human Review, wherever applicable.
